

CHRISTINE HAMORI

COSMETIC SURGERY + SKIN SPA

When considering a skin care treatment, don't you owe it to yourself to choose the very best? **Christine Hamori Cosmetic Surgery + Skin Spa** is a physician-supervised medical spa facility using the latest treatments and techniques to ensure your satisfaction, safety, and desired results. In addition to physician supervision by a board-certified plastic surgeon, our staff includes a registered nurse, licensed aesthetician, and certified technicians. Our clinical, office and waiting areas are designed for your comfort and convenience. We're proud of our facility — please come in and meet our staff and take a look around!

Also, please take advantage of our complimentary skin care evaluation with an aesthetician or nurse who can recommend the best treatments and products for your particular skin type and needs... *for the best you can be!*

CHRISTINE A. HAMORI, MD, FACS

MEDICAL SPA TREATMENTS

○ Ultherapy® - The Non-Invasive Lift

Ultherapy is the only FDA-cleared procedure to non-invasively lift the eyebrow, neck and under-chin — and now also FDA-cleared to improve décolletage lines and wrinkles! It uses safe ultrasound energy to lift and tighten the skin naturally — without surgery or downtime. *Please call to schedule a free consult.*

○ Pellevé® Wrinkle Reduction

Pellevé is an FDA-approved radio-frequency device for smoothing facial wrinkles without surgery. It works by heating the deep layers of your skin and promoting new collagen growth — and feels like a warm facial massage. After the treatment, you will see improvement in your skin quality, firmness and tightness. *Please call to schedule a free consult.*

○ Fractional Skin Resurfacing

This laser treatment targets sun damaged skin, acne scars, fine lines and wrinkles by zeroing in on damaged tissue. Microchannels penetrate into the dermis, eliminating damaged pigmented cells and leaving surrounding healthy tissue unaffected. The body's natural healing process then accelerates the production of new, smoother tissue to replace skin texture imperfections. *Please call to schedule a free consult.*

○ CoolSculpting® by Zeltiq

This non-invasive treatment to gently reduce fat bulges and “love handles” uses an advanced cooling technology that targets and eliminates fat cells. CoolSculpting is strictly non-invasive, with no needles and no incisions. There is no need for anesthesia or pain medications, and there is no recovery time! Common areas to be treated: abdomen, “love handles,” inner and outer thighs. Results are permanent and often visible within 2 months. *Please call to schedule a free consult.*

○ Leg Vein Treatment

Visible red, blue or purple leg and facial veins may occur as a result of sun exposure, oral contraceptives, hormone therapy or age. These “spider veins” can now be treated with a cosmetic laser that emits a prescribed dose of energy to the unwanted veins while sparing the surrounding tissue area. Typically one or two treatments are required for visible results in 4–6 weeks. *Please call to schedule a free consult.*

○ VelaShape™ Anti-Cellulite Treatment

VelaShape by Syneron is a new effective treatment for cellulite. This FDA-approved non surgical body treatment improves body shape and skin tone treating both deep and superficial layers of the skin. Thighs shrink in size and cellulite fades. VelaShape has no-downtime and is virtually painless. *Please call to schedule a free consult.*

○ Thermage® Thermal Lift (Skin Tightening)

Thermage is a safe non-invasive cosmetic procedure that is clinically proven to tighten, contour and rejuvenate facial or body areas to a more youthful appearance. It can significantly improve skin laxity on the face/neck area and can tighten the abdomen, thighs, buttocks and upper arm area. Thermage is FDA approved for the treatment of skin laxity using radio frequency to tighten existing collagen and stimulate new collagen production. *Please call to schedule a free consult.*

ANTI-AGING TREATMENTS

○ IPL Photo Rejuvenation

Phototherapy uses intense pulsed light (IPL) to treat sun spots, pigmented lesions, fine lines, wrinkles and rosacea. By promoting cell growth and enhancing collagen production, IPL leaves behind clearer, smoother and younger appearing skin. Ugly brown spots on face, neck, chest and hands are also treated with this painless light.

○ ViPeel®

We carry the full ViPeel line and can match an appropriate ViPeel to your skin's needs. Formulated with a numbing agent, they are virtually painless, and take less than 20 minutes. Healing time is minimal. Enjoy healthy, youthful, beautiful skin in about a week.

○ Clear + Brilliant

The Clear + Brilliant laser improves skin's tone, texture and radiance. This 15-minute procedure reduces skin irregularities, stimulates the production of collagen resulting in more radiant, youthful skin.

○ NeoPeel®

Glycolic acid and skin brightening agents combine to minimize the appearance of fine lines and wrinkles, dark spots, uneven skin tone and texture — and promote renewed smoothness and radiance. Results are visible with one peel, but more pronounced results require 3–6 peels.

○ Illuminize Peel / Vitalize Peel / Rejuvenize Peel

Three different chemical peels with different acid strengths designed to penetrate deep into the skin to induce exfoliation and collagen regeneration. Effective formulations can reduce brown spots, fine lines and acne breakouts. Skin is left smooth and radiant after just a few days.

○ Glycolic Acid Peel

Designed to smooth and retexture, glycolic peels purge clogged pores and repair sun damaged skin. A 30–50% glycolic acid solution is used to uncover younger more translucent skin. Gentle exfoliation allows for better penetration of skin products and a more youthful glow.

○ Microdermabrasion

We offer DiamondSkin crystal-free microdermabrasion to effectively treat the appearance of fine lines and wrinkles, brown spots, scars and acne blemishes. Similar to particle microdermabrasion and chemical peels, but without the adverse effects of aluminum-oxide particles. Skin is left smooth and glowing following the procedure.

○ Photodynamic Therapy (PDT)

Photodynamic Therapy is a combination treatment of IPL and ALA (aminolevulinic acid) for rough sun spots. A more youthful appearance is achieved by reducing fine lines, age spots, rough spots, rosacea and seboreic hyperplasia. You will notice, healthier, younger-appearing skin.

○ GentleWaves® LED Photomodulation®

FDA-approved for wrinkle reduction, this LED device offers non-ablative skin rejuvenation by stimulating cells to produce more collagen and elastin, minimizing visible signs of aging and decreasing signs of inflammation. It is painless and produces visible results in 4–6 weeks.

ACNE TREATMENTS

○ Levulan® Kerastick Therapy

Levulan ALA is a state-of-the-art treatment for treating stubborn acne. Tiny glands beneath the surface of the skin can become blocked and form pimples. Levulan ALA, combined with a light source, shrinks these glands and kills bacteria in the skin. The treatment is painless; but patients experience redness similar to mild sunburn up to 7 days after treatment. Several treatments may be required.

○ IPL Acne/BLU-U® Blue Light Phototherapy

IPL/Blue Light Phototherapy is a revolutionary, in-office treatment that is FDA approved for the reduction of mild to moderate inflammatory acne. The combination of light based acne treatments destroys bacteria associated with acne and suppresses oil gland production. Recovery time is limited, and most patients return to school or work immediately.

○ Illuminize Peel / Vitalize Peel / Rejuvenize Peel

Three different chemical peels with different acid strengths designed to penetrate deep into the skin to induce exfoliation and collagen regeneration. It is an effective and gentle formulation that reduces brown spots, fine lines and acne breakouts.

○ Back Purifying Treatment

This deep cleansing and exfoliation treatment reduces clogged pores and improves the overall appearance of back skin. A 60-minute procedure, which includes IPL acne/Blue light treatment, helps reduce breakouts.

○ ViPeel®

We carry the full ViPeel line and can match an appropriate ViPeel to your skin's needs — including acne issues. Formulated with a numbing agent, they are virtually painless, and take less than 20 minutes. Healing time is minimal. Enjoy healthy, beautiful skin in about a week.

LASER TREATMENTS

○ Excel V™ laser from Cutera

The award winning Excel V™ is the only laser system that combines two ultra-precise, best-in-class laser wavelengths (532/1064 nm) in one device — providing unmatched flexibility to treat any case, from superficial and deep vascular conditions to benign pigmented lesions. It is effective in treating:

- **Rosacea**
- **Cherry Hemangiomas**
- **Brown Spots** (removal and lightening)

○ Laser Hair Removal

Drastically reduce hair of underarm, upper lip, cheek, bikini line, or back. We now have two laser technologies — for more effective results.

- **We also offer waxing of brow, lip and bikini line**

FACIALS

○ Ultrasonic Facial (DermaSound™)

Pores are cleansed and skin exfoliated with a cascade of gentle soothing microscopic bubbles designed to clean and stimulate the skin. Vitamins are then ultrasonically delivered to deep within the dermis. Derma-Sound extracts toxins, shrinks pores leaving a healthy glow to the face.

○ Oxygen Facial

Oxygen is what helps the skin to look fresh and moist. This facial uses a unique emulsion that helps oxygen penetrate the skin clearing away a dull complexion. This process helps increase circulation, allowing skin cells to function more effectively and achieve their proper balance.

○ Acne Facial

Developed specifically for deep-pore cleansing, this facial gently extracts impurities from the skin and eliminates bacteria that can cause acne. A purifying mask is then applied to restore skin to a fresh radiant state.

○ Enzyme Facial

Designed to energize skin cells with a rejuvenating enzyme process, this facial is especially helpful for sun damaged and premature skin aging.
